The discussions help the students to identify their areas of concern and the interactive sessions give them the opportunity to vent their anxieties and woes. Such programmes initiated by the IQAC, are now held at regular intervals and have become an essential part of the college calendar. Even during the period of pandemic and ensuing lockdown, such sessions were held on the virtual platform to take care of the students' mental health and to uplift their spirits. Another such initiative of the IQAC is the introduction of Gender Sensitization programmes which seek to make the students aware of gender justice and gender equality issues. Such programmes are interlinked with gender empowerment and thereby attempt to fulfill the mission of the institution regarding empowerment of women in an environment of multi[1]culturalism and egalitarianism.

7.1.3 - Describe the facilities in the Institution for the management of the following types of degradable and non-degradable waste (within 200 words) Solid waste management Liquid waste management Biomedical waste management E-waste management Waste recycling system Hazardous chemicals and radioactive waste management

The Institution takes initiative for the management of wastes which is generated within its campus. Solid Waste Segregation is done by hand sorting. The dry waste which includes paper, cardboard, plastics, scrap materials is separated from others. Organic wastes like the leftover food, peels, scrapings from fruits etc are also collected in bins separately and are handed over to the Waste Management Company, Vital Waste through panchayat workers. For E-waste Management, the College segregates old computers, batteries and wires and disposes them at regular intervals. The electronic devices have varying proportions of glass and metals. Hence the disposal helps in consequent recycling of separated streams of aluminum, copper and circuit boards. As these are handed over to Vital Waste, they sort and separate the materials and prepare them for sale as usable raw materials. They are also used for the production of new electronics. However, no hazardous chemical waste is generated in the College Campus. All these ensure that the College takes care of the waste generated regularly by reducing the waste and make an effort for its re-use

and re-cycle. The laboratory wastes are also disposed by taking proper measures.
